- Message / alert display feature

Performance notes
You can scribble your own notes in the margin of songs!

Single-screen style
Control screen looks just like the projected screen.

On-screen chords
Freedom from songbooks! Can be transposed to new key.

Rich text display
With sensible song layout, just like in the songbook!

Outlined / 3D text
Aids readability with photo and video backgrounds.

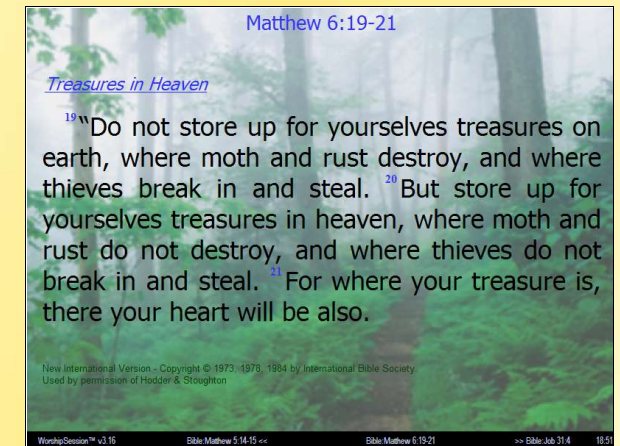

Status area
Shows current position, or status messages.

/ F
Shows that the song has a "Feature" – press F to show it..

/ S
Shows that the song has a soundtrack – press S to play it..

Background image
Or video, can be changed at any time.

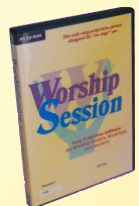

Typical scripture passage display

Prices

WorshipSession CD

£180

The CD includes over 1000 popular songs, and several Bible versions, including the NIV (Anglicised). A "site licence" for your church is standard – one licence covers all your church's activities, and the system can be installed on any number of PCs.

WorshipSession pedal / buttons £40

Primarily designed for musicians and singers who lead worship, the WorshipSession pedal is also great for use with Microsoft PowerPoint.

The Button box is a "keyboard top" variant of the pedal, designed to be used by pianists.

The Message Bible

£15

This new translation of the Bible is youthful and refreshing.

We aim to add more Bible versions all the time – check the Web site for availability.

Free updates forever

free!

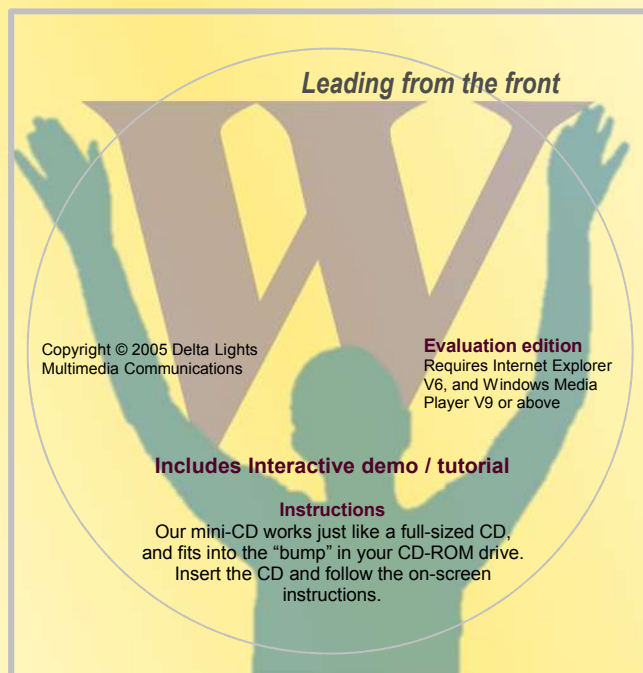

Users can update their software on an ongoing basis. The latest songs and program updates can be downloaded and installed automatically from the WorshipSession server. Updates on CD can be requested at nominal cost.

WorshipSession is produced in the United Kingdom by Delta Lights Multimedia Communications. Prices correct at going to press. For current pricing see the WorshipSession Web site – www.worshipsession.info

Evaluation CD

An evaluation version of WorshipSession can be freely downloaded from www.worshipsession.info, and is also available on CD. The interactive demo / tutorial shows the various features of the system, and is highly recommended.

WorshipSession

Leading from the front

Song Projection Software

**A Multimedia Presentation System
for congregational worship,
combining exceptional ease of use
with a display quality second to none.**

- Expressly designed to be used "on stage" by worship leaders and teachers, WorshipSession delivers outstanding features with the minimum of fuss.
Can also be used from the sound desk!
- The "on-stage" screen is uniquely clear of distracting technical details, and provides "visual foldback" for leaders. The display can include musical chords for musicians, in addition to the song words. *See screen images inside.*
- Unlike most church presentation software, WorshipSession displays songs and scriptures on a single **scrolling page**, minimising screen transitions and allowing worshippers to "read ahead".
